by Trang Nguyen

Brand Overview

mai.premiumlinen is a boutique fashion brand based in Vietnam, specializing in premium linen clothing for a sophisticated, eco-conscious wardrobe. Brand voice: effortlessly elegant, mindful, and serene – a cool breeze in a bustling tropical city.

*This project was completed as the final assignment for the Creator module. **mai.premiumlinen** is an existing brand, not owned by the author. The strategy, content, and automation in this Book were built independently, based on the brand's real public identity and constraints as a one-person operation.*

01

Strategy

Buyer Persona

STDC Framework

Goal Description

Buyer Persona

MINH TRANG

- 20 years old
- University student
- Saigon, Vietnam
- €300 - €700

"I don't want more clothes. I want fewer things I actually love, and I want to know they were made with some kind of care, not just cheaply and fast"

DESCRIPTION

Minh Trang is a Gen Z university student in Saigon. She is passionate about sustainable living and curating a high-quality, breathable wardrobe that keeps her feeling fresh during humid city days, weekend cafe hops, and tropical getaways.

GOALS

- Build a small, considered wardrobe
- Dress in a way that feels effortless for both class and weekend coffee dates.
- Support brands that are actually transparent about sustainability
- Have pieces versatile enough to pack light for weekend trips and travel

PAIN POINTS

- The linen crease dilemma
- Fast-fashion fatigue
- Price sensitivity vs. values conflict
- Fabric care uncertainty

BUYING BEHAVIOUR

- Research before buying
- Buy less, choose better
- Influenced by real, everyday styling over polished studio shots
- Price-sensitive, but stretches budget for pieces she'll wear often

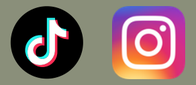

PREFERRED MEDIA & CHANNELS

primary discovery and trust-building channels

casual discovery, styling inspiration, GRWM & travel content

discussions about sustainable living, minimalist lifestyle tips, and local brand reviews

STDC *Framework*

Phase	Mindset	Goal	Channel	Format
SEE	No purchase intent, scrolling casually. Doesn't know **mai.premiumlinen** yet.	Attract attention. Introduce the brand through a feeling, not a product pitch.		**TikTok & IG Reel** 9:16 aesthetic GRWM & cafe outfit lookbooks
THINK	Interested, but hesitating over linen wrinkles, fabric care, and price	Educate on textile quality and build brand trust		**IG Carousel & Threads** Care guides & styling versatility tips
DO	High intent; ready to buy a minimalist set for an upcoming trip	Create buying urgency and drive direct inquiries		**IG DM Funnel** Manychat comment-to-DM triggers & Flash Sale promos
CARE	Proud owner of an eco-friendly piece; eager to share her style	Transform buyers into vocal community advocates		**IG Stories** for re-sharing customer photos **IG Private broadcast channel** for exclusive drop previews

Goal Description

Business Goal

Build a loyal, values-aligned customer base among Gen Z students in Saigon by earning trust through honest, education-led content rather than discount-driven promotion.

Social Media Goal

Increase monthly Instagram DM inquiries from 15 to 60 by Q4 2026, driving 12–15 monthly orders, through 3 weekly posts (2 short-form videos + 1 educational carousel) supported by Manychat and Make.com automation

02

Content Planning

Content Pillars

14-Day Content Calendar

Distribution Plan

Content *Pillars*

mai.premiumlinen's content follows three pillars, each with a distinct job in the funnel:

Community
Human voice

Founder's journey,
behind the scenes,
customer reshares

Builds trust

Product
Fabric trust

Quality signals,
sourcing,
sale campaigns

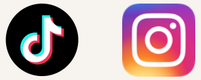

Converts and informs

Education
Slow living

Climate dressing,
care tips,
sustainability

Earns attention

14-Day *Content Calendar*

Day	Pillar	Phase	Content Piece	Channel	Format	Status
Day 1	Education	SEE	Dressed for Saigon Heat		Short-form video	Produced (script ready)
Day 2	Product	THINK	Linen Crease Dilemma		Carousel (6 slides)	Produced
Day 3	Product	THINK	Linen Crease Dilemma – Repost		Text post + product photos	Produced
Day 4	Community	SEE	Founder voice: “Why master tailors, not a factory”		Carousel (3-4 slides)	Documented, not produced
Day 5	Education	THINK	Fabric care & versatility tips		Carousel	Documented, not produced
Day 6	Education	SEE	Travel capsule wardrobe reel		Short-form video	Documented, not produced
Day 7	Product	DO	Flash Sale launch post		Feed post + Story + DM funnel	Produced

14-Day *Content Calendar*

Day	Pillar	Phase	Content Piece	Channel	Format	Status
Day 8	Product	DO	DM funnel auto-reply live		Automation (Manychat)	Produced
Day 9	Product	DO	Sale reminder, last 2 days		Story + countdown sticker	Documented, not produced
Day 10	Product	DO	Flash sale closes tonight		Story + countdown sticker	Documented, not produced
Day 11	Community	CARE	Customer photo reshare		Story with Reshare template	Documented, not produced
Day 12	Education	CARE	Styling tips using purchased pieces		Carousel	Documented, not produced
Day 13	Community	CARE	Exclusive drop preview		IG Private Broadcast message	Produced
Day 14	Community	CARE	Drop preview follow-up		IG Private Broadcast message	Documented, not produced

Distribution *Plan*

Status: All content in this plan is simulated.
mai.premiumlinen's Instagram, TikTok, and Threads accounts are not owned/operated by me for this project. No content has been or will be posted live. All channel names below (except TikTok) refer to the real platforms, but no links are included since nothing is published.

Channel	Platform	Purpose in Funnel	Posting Status
Instagram (Feed)	@mai.premiumlinen	THINK, DO Carousel & sale posts	Simulated; no live post
Instagram (Stories)	@mai.premiumlinen	DO, CARE Reminders, reshares	Simulated; no live post
Instagram (DM automation)	Manychat → Instagram	DO Comment-to-DM funnel	Simulated; automation scenario documented in Day 8, not connected to real account
Instagram (Private Broadcast)	@mai.premiumlinen (simulated)	CARE Exclusive previews	Simulated; no live post
TikTok	@mai.premiumlinen (simulated)	SEE Short-form video	Simulated; no live post
Threads	@mai.premiumlinen	THINK Discussion repost	Simulated; no live post

03 Automation Strategy

Scenario 1

Comment-to-DM Funnel (Manychat)

Scenario 2

Content Cockpit (Make.com)

Tool Switch: Make.com → Manychat

The original plan was to use Make.com for the automation workflow. However, during implementation, it became clear that Instagram's comment-trigger functionality was not available for this account through Make.com due to limitations in Instagram's API access for third-party automation platforms.

To overcome this, Manychat was used instead. As an official Meta partner, Manychat is specifically designed to support Instagram comment-to-DM automation, making it the most suitable tool for this use case.

This change reflects a practical, real-world decision that a solo business owner would make when the originally planned tool cannot meet the platform's technical requirements.

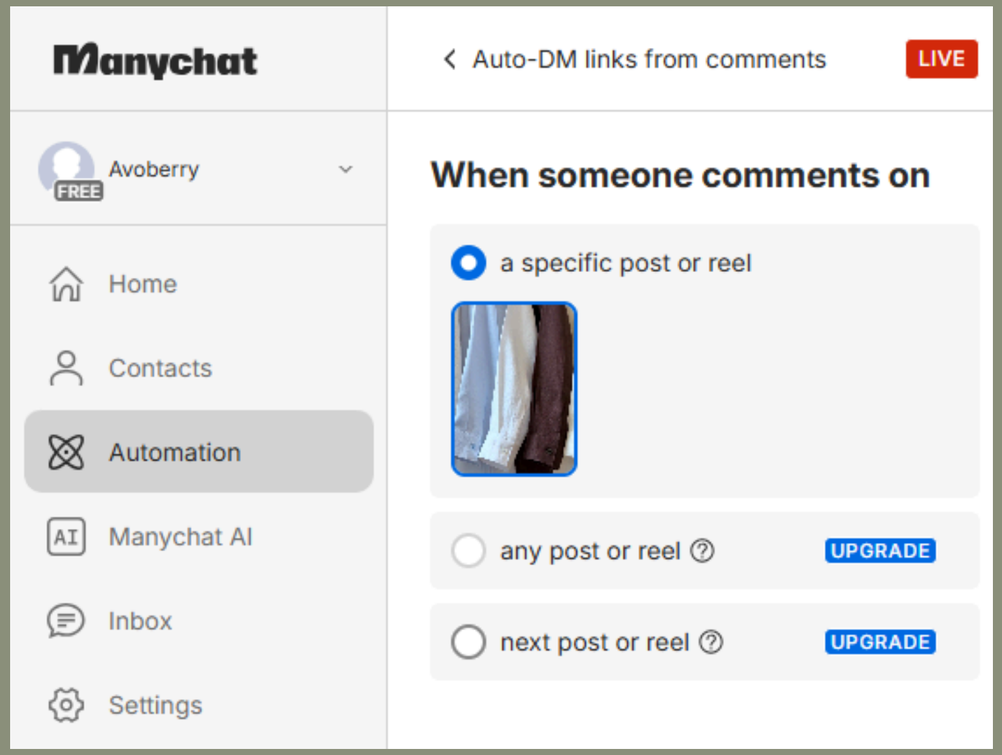

Manychat

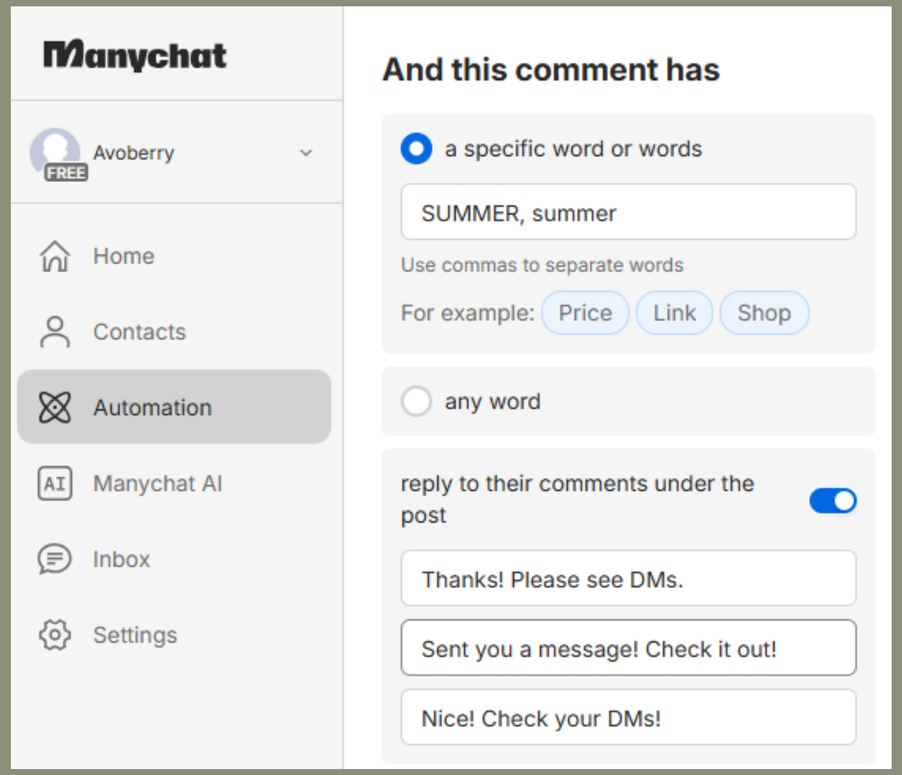

What it automates: When someone comments “SUMMER” / “summer” on the flash sale post, Manychat automatically sends them a two-step DM with greeting message, and then the sale link + sizing guide.

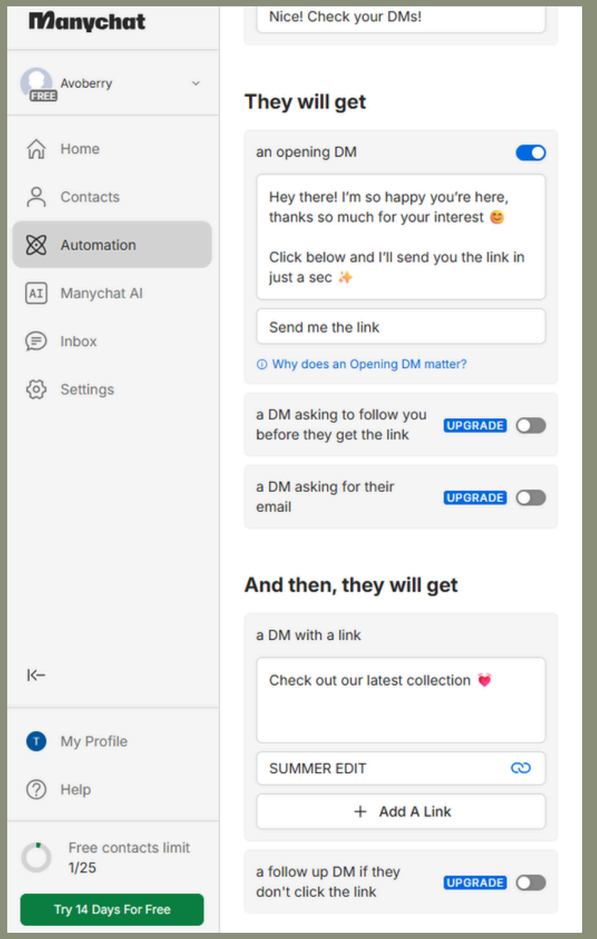

1. Trigger: Comment on a specific post

2. Comment contains “SUMMER” / “summer”
3. Public reply under the comment

4. Opening DM: Greeting + button
5. Follow-up DM: CTA + Link

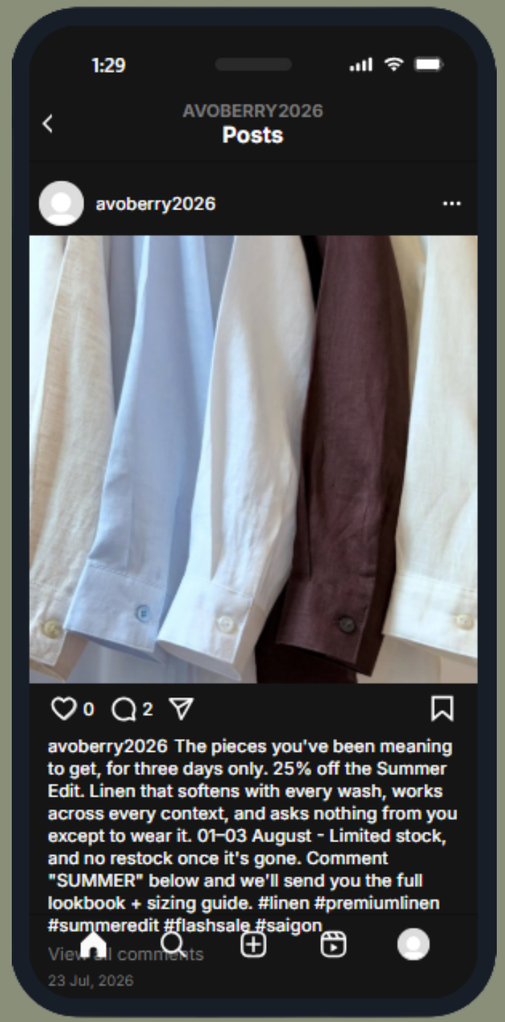

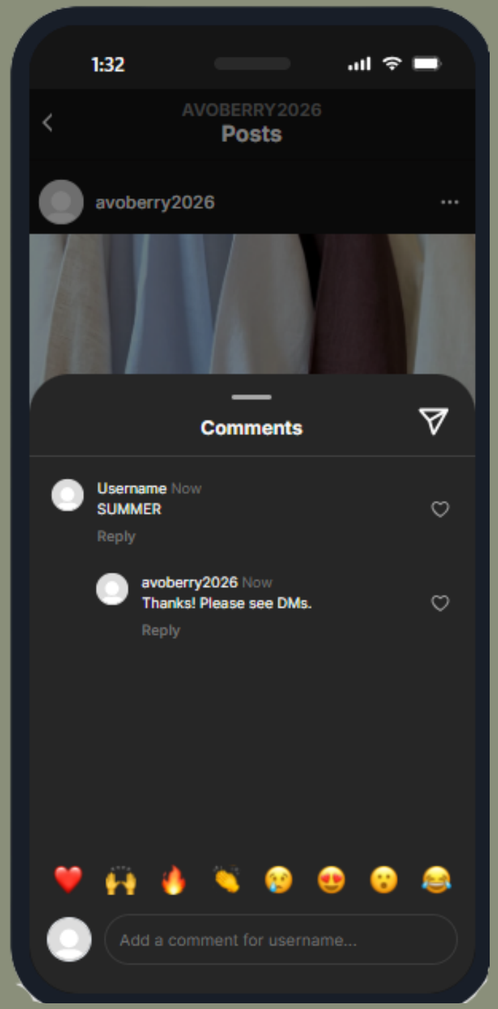

Manychat

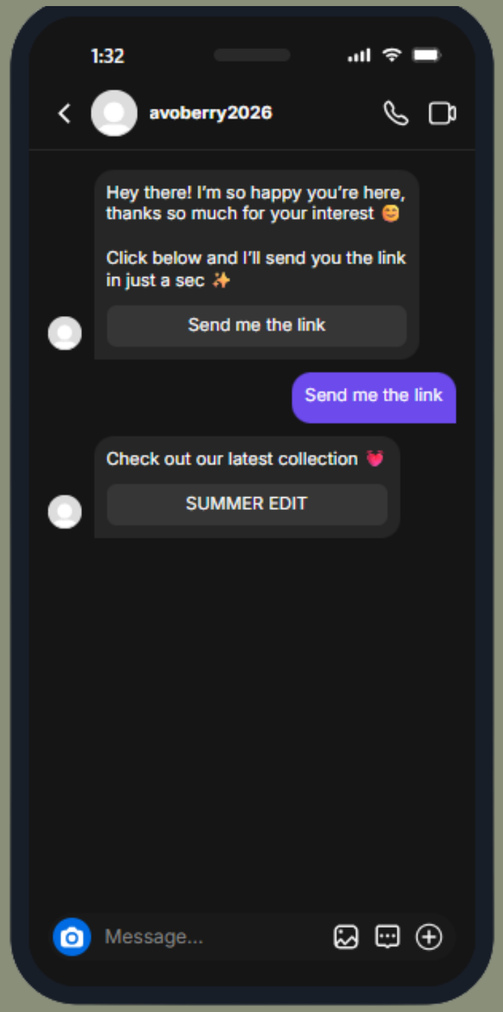

Live Simulation Test

Test account: @avoberry2026 (simulated business account, connected to Manychat)

The automation works exactly as designed, from public comment to private DM, with zero manual intervention.
For a one-person business, this proves the DO-phase funnel can run partly unattended during a live sale, reducing manual work and allowing every customer to receive an instant response.

Note: Account and product images are simulated for testing purposes. The workflow itself, however, is fully functional and ready to deploy on the real account.

Secenario 2

Content Cockpit with Make.com

As a one-person operation, planning content across three pillars and four funnel phases can get disorganized without a system. This automation turns a simple running list of ideas into a structured content backlog automatically, reducing the planning overhead that would otherwise fall entirely on the founder. It also demonstrates Make.com's strength for structured, low-frequency workflows

Live Simulation Test

This scenario automates the classification and expansion of raw content ideas.

1 Idea typed in

Raw content idea entered in Sheets

2 Gemini classifies

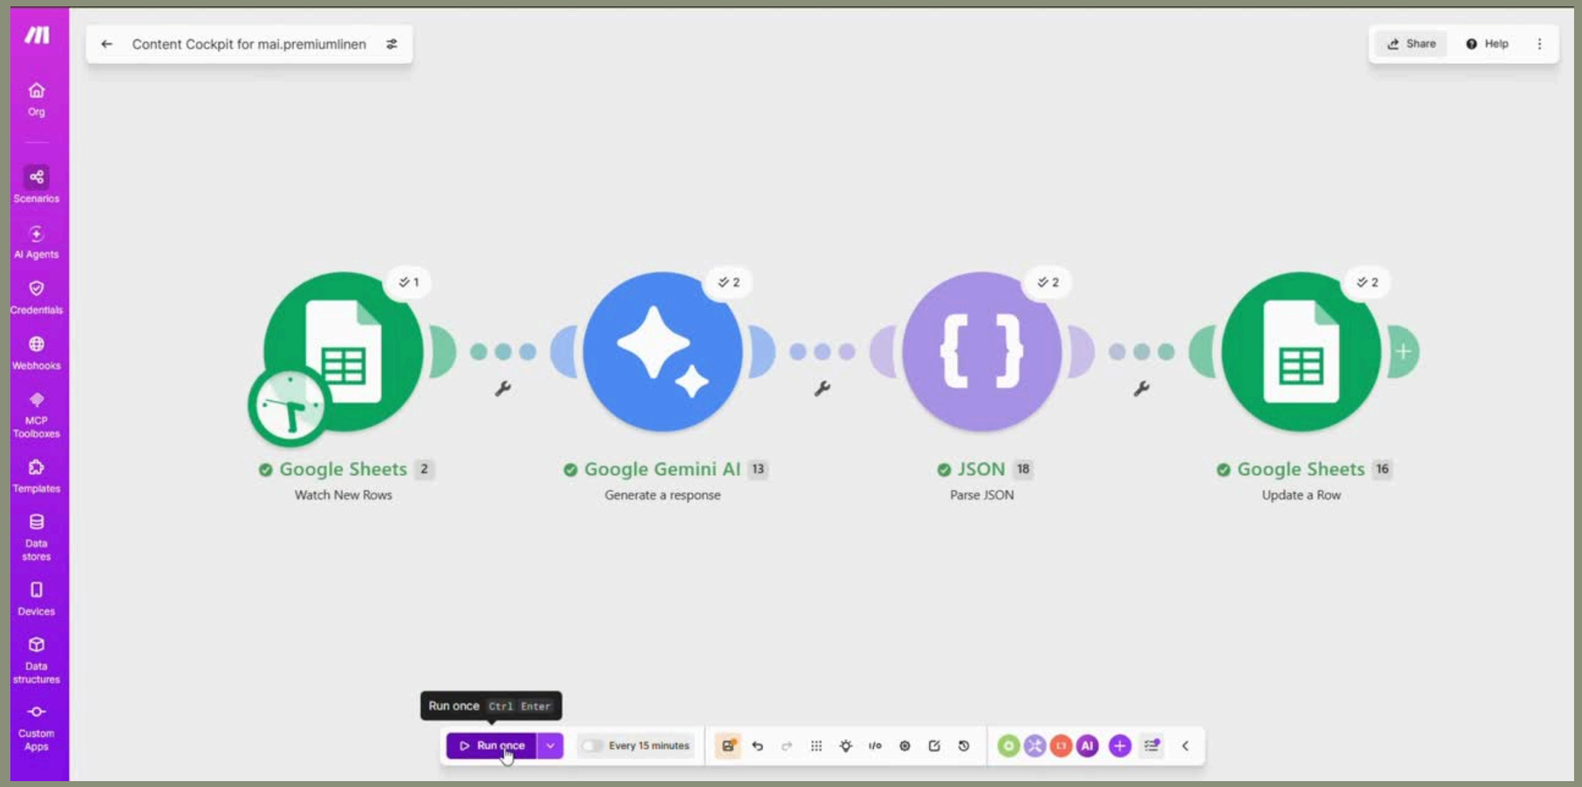

Format, Platform, Pillar, STDC phase, Hook/Inspiration

3 JSON parses

Gemini's output into named, structured variables

4 Sheet auto-fills

results back into the same row

04

Measurement

KPIs per Funnel Phase

Measurement *Matrix*

Funnel Phase	KPI	What it Measures	Primary Tool
SEE	Video views	Reach of top-of-funnel content	IG Insights & TikTok Analytics
	Average watch time / Completion rate	Whether the hook actually holds attention	
	Follower growth rate	New audience entering the funnel	
	Shares / Saves on Reels	Early signal of resonance beyond passive viewing	
THINK	Carousel save rate	Whether content is valuable enough to revisit	IG Insights & Threads Insights
	Comment count / Question replies	Genuine engagement with educational content	
	Threads reply rate	Discussion-driven trust building	
	Profile visits from THINK content	Content moving viewers toward consideration	

Measurement *Matrix*

Funnel Phase	KPI	What it Measures	Primary Tool
DO	Comment-to-DM trigger rate (“SUMMER” comments)	Volume of purchase-intent signals	Manychat Insights & Store Analytics
	DM-to-click rate (link tapped)	Funnel effectiveness from Manychat automation	
	DM-to-sale conversion rate	Actual purchases driven by the funnel	
	Flash sale order volume	Direct sales impact of the campaign	
CARE	Repeat purchase rate	Core loyalty metric	IG Insights & Store Analytics
	Customer reshares / UGC tags	Organic advocacy generated	
	Order volume from broadcast channel	Effectiveness of exclusive previews	

Measurement *Notes*

1

No real tracking is implemented. These are the metrics **mai.premiumlinen** would monitor once live, mapped to each STDC phase.

2

As a solo-run brand, not all KPIs need active dashboards. Instagram's native insights (views, saves, comments, and DM automation stats via Manychat) cover most of this without additional tools.

The priority metrics to actually watch weekly would be **DM rate** and **repeat purchase rate**, since these tie most directly to the SMART social media goal (60 DM inquiries/month, 12–15 monthly orders).

05

AI Labelling

(EU AI Act – Art. 50)

All AI-generated and AI-assisted elements in this project are labelled in accordance with Article 50 of the EU AI Act. This includes AI-generated images (carousel visuals, video clips, portfolio imagery) and AI-assisted text (captions, scripts, copy). Real product photography and original strategic work (persona, framework, planning) are not included, as they were not AI-generated. Each element includes a brief justification for the labelling and tool choice.

All AI tools used in this project (Gemini, Google Flow, Claude) were used with substantial human creative direction (reference photo anchoring, iterative prompt refinement, and manual editing) at each stage.

AI-*Generated*

Element	Type	Tool	Justification
Carousel Slide 2–5 images (Day 2)	Image	Gemini	Generated fabric/product imagery using real product photo as reference anchor
SEE-phase video clips (Day 1)	Video	Google Flow	Generated short-form video clips using real product photo as reference
Carousel captions & Threads repost copy	Text	Claude	AI-drafted copy, refined through iterative prompting for tone accuracy
DM funnel scripts (ManyChat)	Text	Claude	AI-drafted conversational scripts, tested and adjusted against real ManyChat interface constraints.
Portfolio photography	Image	Google Flow	Generated professional portrait imagery for portfolio presentation
Flash sale caption & Story copy	Text	Claude	AI-drafted, refined to remove urgency-heavy language per brand tone

NOT *AI-Generated*

Element	Why excluded
Buyer Persona	Original strategic work, based on user-provided research and input
STDC Framework	Original strategic structuring, adapted from course material
Goal Description (SMART)	Original business goal-setting
Real product photos (Day 2 linen trousers, Day 4 flash sale garments)	Actual photography, not AI-generated
Final ManyChat & Make Automation screenshots	Real screen captures of live tool testing

06

Prompts & AI Rationale

Production Notes

Prompts used

Results

Reflection

Tools used

SEE

TikTok, IG Reels

“Refine the text overlays to follow the AIDA formula. Each scene's overlay must be strictly under 7 words, readable in under 2 seconds, and emphasize ‘quiet luxury’ for Saigon's climate without using hype words.”

Perfectly captured the relaxed, minimalist aesthetic of the brand while matching Minh Trang's preference for effortless styling over heavy sales pitches.

Clip 1: *“Slow close-up pan across folded linen fabric, soft natural morning light, hand gently touching texture, calm and minimal”*

Clip 2: *“Person putting on a linen shirt in a bright bedroom, natural unforced movement, soft diffused light, no music sync needed”*

Clip 3: *“Person walking outdoors in tropical humid setting, linen fabric moving naturally in light breeze, warm daylight, handheld camera feel”*

Clip 4: *“Person sitting at an outdoor Vietnamese-style coffee shop, low plastic stool or rattan chair, small round table, camera focused on her from a side angle while two friends sit across facing away with only their backs / shoulders visible. Tropical Saigon street setting with motorbikes or narrow alley visible softly out of focus in the background, dappled shade from a tree or storefront awning, warm humid daylight, relaxed candid chatting mood, natural unposed body language, editorial minimal style, no text.”*

Clip 5: *“Extreme close-up of linen fabric crease, soft light, slow subtle movement, ending on a still frame”*

Attaching the same real product photo to every clip's text prompt kept fabric color and texture consistent across all 5 generations, avoiding the “different fabric per clip” problem AI video tools often have. Clip 4 initially generated a European-style cafe setting and needed revision to specify Vietnamese sidewalk cafe details (low stools, motorbikes, tropical daylight) to match the target audience's actual environment

Script generation & AIDA copy optimization

Short clips genetation

Video editing, timing cuts to lo-fi beat, and adding text animations

THINK

IG Carousel

“Create a 6-slide Instagram carousel explaining why linen wrinkles, aimed at a Gen Z student audience hesitant about the fabric. Keep the tone premium and minimal.”

Factually accurate but too explanatory; read like a fabric-care FAQ rather than brand content. Lacked emotional hook on the cover slide.

“Rewrite the final carousel slide so it leads naturally into a DM conversation, without sounding like a sales prompt.”

Simplifying to “Still unsure? Ask us anything” outperformed a more instructional first draft (“Have questions about linen care? Send us a message!”); shorter, less like customer service copy, more like an open invitation.

***Slide 2**: Using this reference image for fabric texture, lighting, and color: close-up of the pleated fold detail on the linen trouser, shot from a slightly higher angle than the reference, showing the stitch line and fabric drape clearly, same soft natural window light, neutral warm-white tone, no text, editorial product photography style*

***Slide 3**: … side-by-side split composition; left half shows this linen fabric's natural woven texture in soft light, right half shows a smooth synthetic-looking fabric texture in the same lighting for contrast. Keep both halves minimal, neutral background, no text.*

***Slide 4**: … a woman wearing these white linen trousers, captured from the waist down or with her face out of frame, walking mid-stride so the fabric moves naturally and catches soft natural light. Same warm neutral tone as reference, minimal editorial style, no visible face, focus on how the linen fabric moves and creases naturally with motion*

Attaching the real product photo as a reference anchor (rather than describing it in text) kept fabric texture, color, and lighting consistent across generations. Slides 1 and 4 matched well on the first attempt. Slide 2 initially duplicated Slide 1's framing too closely, and Slide 3's fabric comparison looked artificial; but both were revised in a follow-up iteration.

Educational copywriting, tone refinement, Threads adaptation, CTA iteration

Images generation

Formatting carousel slides using neutral earth tones and clean typography per brand guide

DO

Flash Sale Post, IG DM Funnel

“Write a sales caption for a 25% off linen sale targeting Gen Z. Tell them to comment to get a discount code.”	Effective, but sounded a bit too aggressive/salesy for a premium slow-fashion brand.
“Refine the copy to maintain a calm, ‘quiet luxury’ tone. Emphasize limited small-batch production rather than cheap discounts to protect brand equity.”	Balanced urgency with brand prestige. Framing scarcity around "small-batch sustainability" respects Minh Trang's values while giving her a reason to act fast.
“Write a 2-message automated DM sequence for someone who comments ‘SUMMER’ on a sale post. First message delivers value immediately. Second message reminds if no click recorded & last sale day”	Trigger word matched to campaign name for consistency. Follow-up message is a click-based reminder tied to the sale deadline rather than a vague check-in.

Caption copywriting, DM sequence scripting, urgency-language editing

Promo graphic template with brand fonts and palette.

Manychat Comment-to-DM trigger automation

CARE

IG Stories & Broadcast channel

“Write an Instagram Stories template for resharing customer photos, and a broadcast channel message offering early access to past buyers”

Broadcast message opening with “You've earned VIP access!” sounded like a loyalty program script, too promotional for the brand's quiet, understated tone.

“Remove any language that sounds like a loyalty program (VIP, earned, points). Reframe the broadcast message as a personal, quiet heads-up rather than a reward. Keep it short”

The updated version frames access as personal and intimate rather than transactional. Removing reward-language also kept CARE phase distinct from DO phase, which already carries the discount incentive.

“Write two short caption options for a founder resharing a customer's photo. They should sound genuine, not like generic UGC reposting language.”

Short, understated lines (“this is why we do it”) outperformed longer descriptive captions. For a one-person brand, brevity reads as more sincere than an enthusiastic paragraph would.

Message copywriting, tone refinement

Promo graphic template with brand fonts and palette.

Reflection

This project was completed independently as the final project for the Creator module. **mai.premiumlinen** is not my own business. I chose to work with an existing small brand and develop a complete content strategy based on its real context, limitations, and opportunities as a one-person business.

This project required me to take responsibility for every stage of the process, from research and strategy to content creation, automation, testing, and documentation. Working alone meant every decision had to be made, tested, and refined without the support of a team. It was a valuable exercise in balancing creative thinking with practical problem-solving.

One of the biggest lessons was that the original plan was never going to stay exactly as intended. For example, the initial workflow was designed around Make.com, but during implementation I found that it couldn't monitor Instagram comments in the way the project required. Rather than forcing the original approach, I switched to ManyChat because it provided the functionality needed. Instead of treating this as a setback, I documented the change and the reasoning behind it. The same pattern appeared during content production. One Google Flow prompt for a café scene repeatedly generated a European-looking environment instead of a recognisable Saigon setting. It took several rounds of prompt refinement before the visuals reflected the atmosphere I was aiming for.

If this brand were to grow into a larger operation, the first responsibility I would delegate would be content production, particularly carousel design and short-form video creation. These tasks are repetitive and time-intensive, making them well suited for collaboration or outsourcing. Strategy, positioning, and brand voice, however, are areas I would continue to oversee closely, as they provide the consistency that connects every piece of content.

Overall, this project showed me that for a small, one-person brand, success depends less on producing more content and more on building a system that is sustainable. Clear content pillars, thoughtful automation, and repeatable workflows make it possible to maintain quality without relying on constant manual effort.

09

Brand Guidelines

Logo Guideline

Brand Guidelines 01

Logogram

Abstract "M" mark combining sharp angles with sweeping curves, anchored by a downward triangular wedge at center. Balances structure and fluidity.

Logotype

"mai" in connected lowercase script, paired with "PREMIUM LINEN" in thin, letter-spaced sans-serif caps. Script conveys craft and personality; caps add precision.

Lockup

Wordmark nests inside the logogram's negative space, unifying mark and name into one composition.

Main Logo (solid & transparent bacgrounds)

Brand Guidelines

Typography

Typefaces are the way our brand communicates its voice and tone. These fonts are meant to balance hierarchy and readability to ensure our brand remains recognizable and cohesive across all mediums and touchpoints.
